

The Kekistani People Declaration of Liberty

Our culture condones irreverence & mischievousness and it tolerates the potentially offensive because without these reliefs and transgressions liberty becomes serfdom, freedom becomes fear and social interaction becomes the stultifying dead hand of collectivist conformity.

We yearn for this freedom of thought and speech but we are yoked everywhere by the oppression of collectivist ideology, therefore we the Kekistani People create our own safe spaces where we exile the evils of social justice.

We are united in our opposition to restrictions on expression of thought & speech, so that we may freely hate the hateful, freely ridicule the ridiculous and freely think the unthinkable.

We declare that genetics has imbued us with inherent rights and needs that must never be taken away from us by ideology

We allow the promulgation of hypotheses of any nature always on the basis that they can be examined and tested by reality, opposed by counter-hypotheses and subject to jest or ridicule.

It is within that genetic imperative and our developed culture that we accept offense and hatred as natural parts of life that can never be eradicated and that attempting to do so by oppressive legal or mob rule will inevitably lead to violence and the destruction of peaceful society

We the Kekistani People demand that respect for our ethnicity, our culture and our sacred beliefs be written into law of any Sovereign Nation which is fortunate to have us as citizens.

We the undersigned attest to this sacred oath

REPUBLIC OF KEKISTAN
